

QSHE Policy

Sunray aims to be a trusted leader in civil construction by delivering quality infrastructure projects while maintaining environmental sustainability and occupational health & safety excellence of employees, contractors, clients, and stakeholders.

This shall be achieved through

- Timely Deliver projects that meet customer requirements, specifications, and statutory/regulatory standards with optimal cost, quality and technical accuracy.
- Encourage innovation and sustainable construction practices for effective project management, prevention of pollution, efficient and optimized usage of natural resources, prevent work related injuries and ill health.
- Comply with all applicable legal, statutory, and other requirements related to quality, environment, and occupational health & safety
- Establish measurable QHSE objectives and monitor performance regularly to promote continual improvement of Integrated Management System.
- Conduct regular skill development programmes to Identify risks and opportunities related to project execution and management systems
- Encourage all stake holders to commit these principles and actively foster them in their workplace through participation and consultation to contribute a safer, healthier and more sustainable future.
